

# 40 Series Cutlery

Individual Part Length

Fork	Knife	Teaspoon	Soup Spoon
6.2"	6.2"	5.6"	5.1"

## **A New Generation of Cutlery!**

Starting in 2017, Max Packaging will begin transitioning all B Series cutlery to our new 40 Series cutlery. This is being done to facilitate a more modern and competitive design, while meeting higher manufacturing standards going into the future. Please read the following information and feel free to contact us for any further concerns.

### **Modern Design**

- 40 Series was created using the latest in computer-aided design software and techniques. Although this creates a lighter part, it allows 40 Series to be especially robust and efficient compared to our previous B Series. These benefits are similar to 60 Series, so please view our 60 series brochure ([here](#)) for more design explanations.

### **More Functional Fork**

- Our 40 Series fork uses an updated tine and edge design. The tines have a more pointed and gradual shape, while the edge of the fork has a similar cutting profile. These improvements allow the fork to pierce and cut food in ways classic designs simply cannot match!

### **Exclusive Knife Teeth**

- Our 40 and 60 Series knives use a Max Packaging patent pending design. This unique scalloped cut design reduces teeth wear, cutting effort, and bogging while still cutting in both directions. This adds up to our most impressive performing knife yet!

### **100% Polystyrene Plastic**

- This new cutlery uses no filler and is made from 100% polystyrene plastic. This improves the part's gloss, consistency, and color creating an attractive and tasteful cutlery series!
