

# Max Stackables Eco-Benefits

## Economical Case Sizes

Stacking cutlery forms an organized structure when ordered in bulk. This allows box sizes to shrink between approximately 20% and 54% for the same amount of cutlery.\* Inventory space and cardboard used for the same amount of cutlery is greatly reduced!

### Classic Cutlery

### Max Stackables

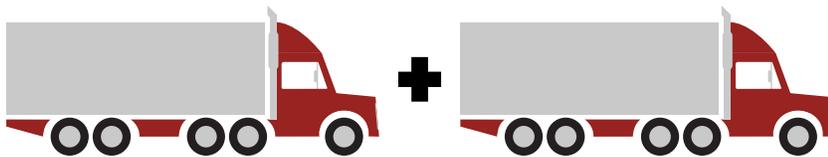

\*Reductions are based on comparisons of bulk cutlery and vary between series and parts.

## Reduced Fuel Consumption

These smaller cases also allow more cutlery to be loaded on to each truck for maximum efficiency. This reduces fuel consumption from us to you and you to your customer!

### Classic Cutlery

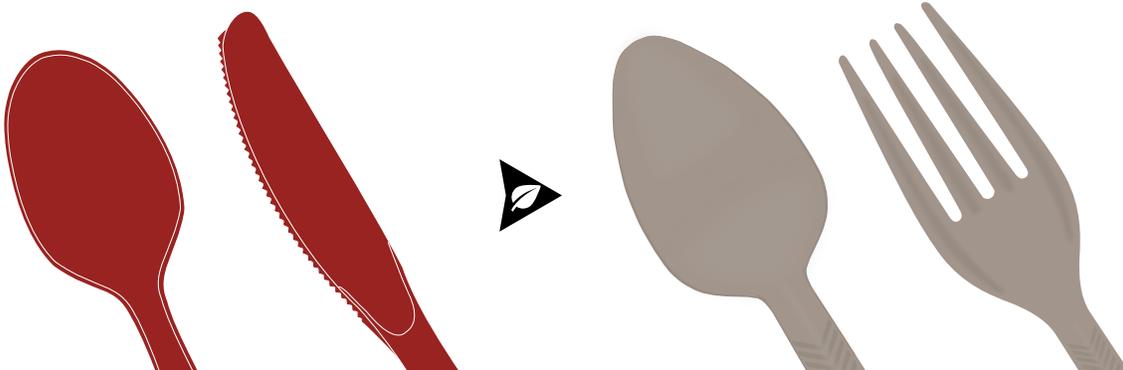

### Max Stackables

## Efficient Use of Materials

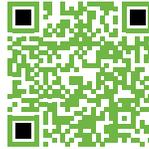

Using modern computer-aided design, Max Stackables make more efficient use of plastic while achieving higher performance than their predecessors. This creates a noticeably more eco-friendly design that reduces the amount of plastic used!

## 40 + CPLA 40 Series Cutlery

Our 40 Series cutlery is available in 100% polystyrene or our latest CPLA material. Natural and compostable, our CPLA 40 Series is environmentally friendly while maintaining our high standards of performance!

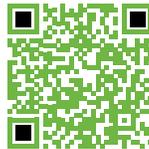

- **40 Series: Medium Weight**
  - **Black, White, Beige, and Clear**
- **CPLA 40 Series: Medium Weight**
  - **Natural Color**

## 50 + 70 Series Cutlery

Both 50 and 70 Series sport all the benefits of Max Stackable cutlery combined into a tough and flexible polypropylene design. These two designs are among our most versatile and capable cutlery!

- **50 Series: Heavyweight**
  - **Black, White, and Beige**
- **70 Series: Extra Heavyweight**
  - **Black, White, and Beige**
  - **Full Size Cutlery**

## 60 Series Cutlery

60 Series is a polystyrene cutlery line that uses a Max Packaging patent pending design to offer the most efficient use of plastic, all while maintaining a full size cutlery specification.

- **60 Series: Heavyweight**
  - **Black, White, Beige, and Clear**
  - **Full Size Cutlery**
