

is proud to present Eco-Conscious Cutlery

Max Packaging is pleased to offer a line of environmentally-conscious cutlery. These cutlery products are bio-based and GMO free.

PSM (Plastarch Material) is a polymer that is derived from the natural source of corn starch. The starch is produced from the stalks rather than the kernels, so it utilizes what is considered a waste product. It is a sustainable crop, growing at least twice yearly in the proper climate.

Genetic Modified Organism Free (GMO Free), the cutlery is heat resistant. The meal kit is manufactured in Alabama and consists of a knife, fork and spoon.

The Environmentally Smart cutlery is available as bulk, single-wrap or customized meal kits. The meal kits listed below come with a 2-ply 13" x 17" natural kraft napkin.

Remember, we can customize your meal kits to your specifications.

Item ID	Description	Count	WT (lbs)	Cube	Length	Width	Height	TI	HIGH
