

50 Series Cutlery

Individual Part Length

Fork	Knife	Teaspoon	Soup Spoon
6.3"	6.5"	5.8"	5.6"

50 Series Features

Stacking Efficiency

- Our 50 Series uses a new stacking cutlery design. This allows the cutlery to stack tightly on top of one another, creating a smaller case cube where the cutlery reinforces its packaging. This means you can store more cutlery in less space while greatly reducing the chance of damaging your product!

Improved Performance

- Fork tine improvements can be seen in the shape and side profile. The tine shape tapers to a finer point allowing them to pierce food much easier. The side profile is also angled inward to prevent a flat edge and cut food unlike classic designs. Like our 70 Series, 50 Series has among the most versatile and capable forks in our lineup!
- The knife teeth have been thoroughly redesigned. These stronger and wider spaced teeth cut in both directions, prevent rollover, and reduce wear compared to classic designs. 50 Series customers can expect great knife performance throughout the entire meal!
- Our spoon now has a wider joint where the handle and bowl meet. This reduces flexing, such as when scooping ice cream, and makes the 50 Series spoon among the toughest on the market!
- Better mold separation can be seen along the edge of all 50 Series cutlery. This reduces rough edges along the tines, bowl, and teeth which eliminates scraping inside the mouth that can occur with older cutlery.

Modern Style

- The look of our new 50 Series was designed with a more stylish and innovative appearance. With its visible stacking channels, sleek edges, and a chevron handle 50 Series is unmistakably modern!
