

# 70 Series Cutlery

Individual Part Length

Fork	Knife	Teaspoon	Soup Spoon
7.1"	7.2"	6.1"	5.9"

# 70 Series Features

## Stacking Efficiency

- Our 70 Series uses a new stacking cutlery design. This allows the cutlery to stack tightly on top of one another, creating a smaller case cube where the cutlery reinforces its packaging. This means you can store more cutlery in less space while greatly reducing the chance of damaging your product!

## Improved Performance

- Fork tine improvements can be seen in its shape and side profile. The tine shape tapers to a finer point allowing them to pierce food much easier. The side profile is also angled inward to prevent a flat edge and cut food unlike classic designs. This allows 70 Series to have among the most versatile and capable forks in our lineup!
- The knife teeth have been thoroughly redesigned. These stronger and wider spaced teeth cut in both directions, prevent rollover, and reduce wear compared to classic designs. 70 Series customers can expect great knife performance throughout the entire meal!
- Our spoons now have a wider joint where the handle and bowl meet. This reduces flexing, such as when scooping ice cream, and makes 70 Series spoons among the toughest on the market!
- Better mold separation can be seen along the edge of all 70 Series cutlery. This reduces rough edges along the tines, bowls, and teeth which eliminates scraping inside the mouth that can occur with older cutlery.

## Modern Style

- The look of our new 70 Series was designed with a more stylish and innovative appearance. With its visible stacking channels, sleek edges, and a chevron handle 70 Series is unmistakably modern!

# 70 Series Specifications

## 70 Series Extra Heavy Polypropylene Bulk

Item ID	Description	Count	WT (lbs)	Cube	Length	Width	Height
FW 70 1M	Bulk Fork - White	1000	10.34	0.49'	25.59"	7.40"	4.45"
