

# *New F Series Cutlery!*

## Individual Part Length

Fork	Knife	Teaspoon	Soup Spoon	Spork
5.94"	6.38"	5.63"	5.38"	5.44"

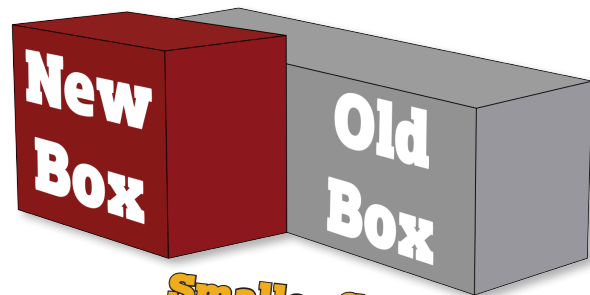

## ***New Generation F Series Cutlery!***

Max Packaging will begin transitioning all polypropylene F Series cutlery to our new generation F Series product. This new medium weight design has many benefits compared to the previous non-stacking F Series. Please read the following information and feel free to contact us for any further concerns!

### **Stacking Design**

- Stacking cutlery can occupy a much smaller case cube. When comparing bulk F Series spoons, the new box is approximately 45% smaller than the old box for the same 1000 count. Shipping more cutlery in less space reduces fuel consumption in transit, which results in a much more environmentally friendly product!

***Smaller Cases  
for Better Cutlery!***

### **Improved Cutlery Performance**

- Using modern design techniques and industry experience, cutlery performance is noticeably improved. The fork has sharper tines to pierce food, the knife has a new serration design to cut better, while the spoon bowl is stronger to resist cracking.

### **Stronger Cutlery Handle**

- Bracing and material distribution along the handle has been improved compared to the previous design. Our new F Series handles are stronger than ever before!

### **New Spork Design**

- The new generation F Series spork has been vastly improved. Incorporating the sharper tines of the fork and stronger bowl of the spoon, the new spork proves to be a confidence inspiring piece.
