

Cutlery Characteristics

Max Packaging offers a complete range of disposable cutlery. This catalog includes specifications for bulk and single wrapped cutlery. Please refer to additional material for information on our other product offerings. This information can be found through our website (www.maxpackaging.com) or you may contact us to request literature (256-538-2233).

Polypropylene Characteristics

Polypropylene cutlery is generally defined by the following characteristics:

- Highly flexible and resists breaking
- Parts tend to be shorter in length and smaller in scale to polystyrene cutlery
- Preferred for applications where high stress is placed on the cutlery

Polystyrene Characteristics

Polystyrene cutlery is generally defined by the following characteristics:

- Rigid and unbending structure
- Parts tend to be longer in length and larger in scale to polypropylene cutlery
- Preferred in applications where high performance is desired from the cutlery

Compostable Characteristics

Compostable (CPLA) cutlery is generally defined by the following characteristics:

- Especially rigid and unbending structure
- Part sizes are comparable in length and scale to their plastic counterparts
- Preferred in applications where high performance compostable cutlery is desired
